## DETAILED ACTION

### *Priority*

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

### *Claim Rejections - 35 USC § 102*

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-22 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent no. 5,308,019 to Karlsson.

Karlsson discloses a dual bearing reel to be attached to a fishing rod, comprising: a basic unit including a spool 7 for winding or reeling out a fishing line by being rotated in normal or reverse direction, a spool driving mechanism 10 for driving the spool and an attachment frame 1 to which the spool and the spool driving mechanism are attached such that the spool and the spool driving mechanism can function in cooperation with each other; and an outer plane portion (4, 5) that is attached to the attachment frame of the basic unit.

The unit further includes a braking mechanism and level winding mechanism 8 attached to the attachment frame. The outer plate portion has a first engagement portion; the attachment frame has a second engagement portion; and the outer plate portion is detachably attached to the

attachment frame by engaging the first and second engagement portions; the first engagement portion includes a pin (unnumbered pin extending through 4) projecting from the body portion; the second engagement portion includes an engagement bore which engages the pin.

The attachment frame 1 includes a pair of side portions (2, 3), a cross member (unnumbered) that bridges over the pair of side portions, and a leg portion (unnumbered) that is attachable to the fishing rod.

The outer plate portion includes first through third outer plate members (4, 5, 11 and unnumbered member attached to member 1 between member 5 and 1).

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
